DETAILED ACTION

Election/Restrictions

1. Claim 1 is generic and allowable. Accordingly, the restriction requirement as to the encompassed species is hereby withdrawn and claims 5-8, directed to the species II corresponding to Figures 9, 11 and 13 are no longer withdrawn from consideration since all of the claims to this species depend from or otherwise include each of the limitations of an allowed generic claim.

In view of the above noted withdrawal of the restriction requirement as to the linked species, applicant(s) are advised that if any claim(s) depending from or including all the limitations of the allowable generic linking claim(s) be presented in a continuation or divisional application, such claims may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Once a restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. See *In re Ziegler*, 44 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

EXAMINER'S AMENDMENT

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Michael Fogarty on 01/28/04.

The application has been amended as follows:

Art Unit: 1745

In the claims:

a) please, cancel claims 9-11.

3. The following is an examiner's statement of reasons for allowance: the applicant's reply explicitly presents reasons why the instant claims are patentable over the references. Refer to the amendment of November 13, 2003 containing applicant's rebuttal arguments. In this regard, the primary reason for the allowance of the claims is premised on applicant's rebuttal arguments remarking that the major difference in the claims not found in the prior art is the inlet-side through hole and the outlet-side through hole penetrating the separator, and the inlet-side connection groove and the outlet-side connection groove for connecting the inlet-side and the outlet-side through holes with the fuel gas inlet-side manifold aperture and the fuel gas outlet-side manifold aperture on the cathode side of the separator. The instant application is deemed to be directed to an unobvious modification over the invention of Mizuno et al'827 and the JP'289 publication.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Raymond Alejandro whose telephone number is (571) 272-1282. The examiner can normally be reached on Monday-Thursday (8:00 am - 6:30 pm).
